**Rationale for Proposal**

Update the change in CHEM 101 and 111 to CHEM 119. Update the change in CHEM 102 and 112 to CHEM 120. Justification: Update CHEM 101 and 111 to CHEM 119. Update the change in CHEM 102 and 112 to CHEM 120. This effort was supported by the Center for Teaching Excellence at Texas A&M University and relied heavily on data collected from the department’s stakeholders (students, industry, internal faculty, and external faculty). Using a data-driven systematic process the committee was able to: 1) Define the discipline with an intentional focus on why and for whom it exists 2) Determine the knowledge and skills required of today’s animal scientist 3) Develop a disciplinary-purpose aligned curriculum. These outputs were used to develop 3 disciplinary specific outcomes and 7 universal skill outcomes that have been built into every aspect of the curriculum. Accordingly, new degree plans, new courses, changes to required courses, and redefined prerequisites for existing courses, all of which align with the outcomes, are being submitted for approval and subsequent implementation.
