REPORT OF THE GRADUATE COUNCIL
June 3, 2004

Department Request for a New Course:

A617 BUSH 627 Multinational Enterprises (3-0) Credit 3. This graduate seminar provides a
broad survey of the field of international business. This course covers multinational enterprises in a
variety of sectors, countries, and organizational forms. The focus is primarily on the past 20 years, but
the historical development of MNEs is also examined. Prerequisite(s): Graduate Classification; Instructor
Permission.

A629 BUSH 634 Public Management (3-0) Credit 3. This course will address three critical
aspects of public management; the role of management in the public sector, validity of the argument that
government should be run like a business and the tools public managers need to be effective.
Application of organizational theory concepts will be applied to case studies. Prerequisite(s): Graduate
Student Classification.

A643 BUSH 643 Foundations of the Non-Profit Sector (3-0) Credit 3. Will provide an
overview of the origins, size, scope and composition of the non-profit and voluntary sector in American
society today. An introduction to the historical, political and religious foundations of the non-profit sector
will also be examined. Additionally students will examine the theoretical and conceptual framework in
this course. Prerequisites: Graduate Student Classification.

A644 BUSH 644 Management & Leadership of Non-Profit Organizations (3-0) Credit 3.
This course will be to provide an introduction and overview of non-profit organizations and the
environment they operate in. Examination of the distinctiveness of these organizations and the special
skills required for effective management of them will be studied. Also empirical and normative issues
surrounding non-profit management and leadership will be studied. Prerequisite(s): Graduate Student
Classification.

A645 BUSH 663 Homeland Security and America’s New Long War (3-0) Credit 3. An
introduction to the theory, practice, challenge and prospects for securing the “American Homeland”
against terrorist attack, with special emphasis on how American policy makers are resolving this dilemma,
and their prospects for the future. The course will draw heavily on current events and emerging policy
solutions as examples. Prerequisites: Graduate Classification.

A646 BUSH 664 National Security Law (3-0) Credit 3. An introduction to the nature and
sources of national security law including such topics as the framework of separate branches of law with
shared national security powers, maintaining national security abroad, terrorism and other national
security threats, and protecting national security information. Prerequisite(s): Graduate Classification.

A647 CARC 604 Advanced Field Studies in Design Innovation (3-9) Credit 6. Advanced
design innovation in international and domestic environments away from Texas A&M University campus;
emphasis on the cultural, social economic, geographical, climatic and technological factors influencing
design solutions for human needs. Prerequisite(s): Graduate Classification.
