### Rationale for Proposal

**Updating ICD/CD requirements.** ~~The Health Humanities is a growing, cross-disciplinary field that practices the analysis of health and illness within cultural activities and products. Students of the Health Humanities may use methods of analysis drawn from history, literature, philosophy, bioethics and comparative religion, as well as those social sciences that “employ humanistic methods relevant to medical enquiry and practice, such as sociology, anthropology, and psychology,” in order to better understand the lived experience of health and illness (Jones et al, 4-5). Health Humanities serves to question the “two cultures” thesis that postulates the sciences and humanities are separate, arguing instead that our experience of health and illness is never only biological or “cultural,” but always both. Grounding in this interdisciplinary field prepares undergraduates with skills and knowledge relevant to careers in healthcare or graduate school in humanities or social sciences.~~
